Town Belle Criticised.

A town belle got off the train at a small town between Atchison and Topeka last night, says Ed Howe. She shook hands with her left hand, wore a larger hat than the girls who met her, wore pretty loud clothes, chewed gum and when she hit the cinder plat form of her home town a lot of people grinned at her and said: "Hello, there!" This town belle was not bad looking but she couldn't keep her mouth closed even when she was not talking.—Kansas City Journal.

to an End. New York.-The first convention of the National Arbitration and Peace congress came to an end Wednesday night, after a three days' session, with two large banquets, one at the Hotel Astor and the other at the Waldorf-Astoria. The event of greatest interest was the decoration of Audrew Carnegie with the cross of the Legion of Honor by the French government, represented by Baron D'Estournelles de Constant, in appre ciation of his work for peace, and his gift of the palace at The Hague.

Mr. Carnegie, who is president of the congress, gave out a statement as to the results of the congress. Although not so designated by Mr. Carnegle, the statement constitutes a reply to some of the suggestions contained in the letter which President Roosevelt addressed to the congress on its opening day.

The resolutions adopted recom

mend among other things that The Hague conference hereafter shall be a permanent institution; that The Hague court shall be open to all the nations of the world; that a general treaty of arbitration for ratification by all the nations shall be drafted "next friends" have been induced to by the coming conference providing loan their names for use in the suit "at the instinction and at the expense of international disputes which can not be adjusted by diplomacy; that the United States government urge upon the conference action looking to the limitation of armament; that the conference extend to private property at sea, immunity from capture in war. The resolution speaks highly in praise of President Roosevolt, Secretary Root and the prime minister of Great Britain for the stand they have taken in favor of a settled policy of peace among nations. The resolutions were adopted manimously with a few minor changes as to wording just as they came from the committee which had had their preparation in charge.

IN TWO SHADES OF SILK. Directions for Useful and Ornamental

Work Bag. This pretty work bag is made of slik and crochet-covered brass rings. A light shade of silk is used for the bag part. A darker shade of crochet silk, or silk-finished cotton for the brass rings. A pretty combination is made by having the bag of pale lavender, the crocheting of deep royal purple brass rings used are about fiveeighths of an inch in diameter. There are nine resettes of the brass ring work in a row. Each rosette is com-posed of one ring in the center, surrounded by six rings. Make one round of nine resettes. Between each of these nine rosettes, fasten the lower row of rosettes. Crochet a chain across the top. On this chain work eight rows of openwork. Finish with simple crocheted edge. This is caught on the bag just below the drawing strings. The last row of rings is fastened to bottom of bag. The silk bag part is 22 inches across, and the same in length before a hem of six inches is made at top. Do not sew up the bottom until you have cut a round piece of pasteboard six inches square.

Put a piece of sheet wadding sprinkled with sachet powder over this. Cover it with silk both sides. Sew this neatly to bag, fasten last row of

rings to bettom of hag, run in drawing strings to match the crochet. Any two

shades may be used for this bag, al-ways having the bag part a light color, while the crochet work should be darker.

What is worth doing at all is worth doing well, and it is not caring for stock well to neglect to give them at least a slight brushing. No great amount of time need be

Be regular about feeding, watering, grooming and milking, and your stock will look well even if you have other work to demand a good part of your time.

But if one has the stock to require one man most of the time to care for them it is better to have one man do the work rather than have two or three do the work up quickly and then ill go at something else. A regular man in the barn, with perhaps some help about the milking, is better than two or three part of the time and then to one in the barn-through the day, The illustration, from Klinball's Dairy Farmer, shows the employees of

Jerseys, and they are always clean and free from a thick coat of manure or their thighs, says a writer in Orange Judd Farmer. We brush them down before milking. But the secret of keeping a cow clean is in the stall. No cow should be tied in a stable without a platform, as it would be impossible to keep her clean even if she were clipped. Any farmer can make a plat form in his stable out of clay or ce ment. I like a clay platform with cement gutter. The platform must no be too long or too short; It must be just right for the length of the cow. Keep the platform will littered with

straw. Clean the gutters twice a day, and cows can be kept nice and clear vithout clipping them. Give the Calves Sunshine. Too rich milk should not be fed, and if found not agreeing with the calf in its earliest days geduce the new milk with warm water and do not feed too much at one time. Keep the culves in a bright sunny room, giving them plen-

ty of clean shavings or cut bedding every day, and do not let their bedding get damp. Use all slucked lime occa-sionally to sweeter the stable floor and use land plaster every day. We allow ny box stalls where they can caper about to their hearts' content.—II. O. Danlels in New New England Home-

## Gold Coin Stock Foods. SIX FEEDS FOR 1 CENT! ON 30 DAYS TRIAL Pail Tub or Barrel

The largest stock feeders in the country use Gold Coin Tonics. Many started by taking advantage of this TMal Offer. You can do the same. We guarantee you extra profits. Gold Coin Tonics are scientifically prepared from Roots, Barks, Seeds and Herbs, which animals were able to secure in their wild state, but which you must supply them now. These scientific Tonics give your stock a chance to do better. You only put a tablespoonful of these "Tonics" in the regular feed; it sharpens the appetite, purifies the blood, aids digestion, strengthens the kidneys and keeps the animals healthy and growing. These animals increase 15 to 25 per cent over the old methods of feeding. One of these beautiful pier-

Medical Bills Postponed.

At the senate session April 12 a large number of bills were disposed of. Consideration of what are known as the medical bills was postponed, and the senate committee on military affairs reported the indefinite postponement of the assembly bill to authorize an investigation of the affairs of the Waupaca veterans' home. The barber bill amending in some slight particulars the present law was passed without debate. The senate adjourned until April 15.

Three Measures Killed.

Among the bills killed was one by H. H. Hellbron of Milwaukee requiring street car companies to keep the vestibules of their cars heated to A5 degrees Fahrenheit during cold weather; one by Otto Harrass authorizing cities to condemn and purchase public utilities, and one by L.
